Title: Created by transplanting the NIH scoring instructions into the new R01 format
Section 2: Specific Aims (1 page)
  AIM 1
  AIM 2
  AIM 3

Section 3: Research Strategy (12 pages)
  a) Significance
      i) What is the important problem in the field?
      ii) What is the critical barrier to progress in the field?
      iii) How will the success of this grant change [PICK ONE] (scientific knowledge, technical capability, clinical practice) in the field?
      iv) How will the success of this grant change [PICK ONE] (concepts, methods, technologies, treatments, services or preventative interventions)?
  Place a line about productivity/publications at the end of this section because the “investigator” section appears next in the NIH critique checklist.

  b) Innovation
      i) This proposal uses novel [PICK ONE] theoretical concepts, approaches, methodologies, instrumentation or interventions
         Distinguish whether they are novel to one field or novel in general
      ii) The grant proposes a [PICK ONE] refinement, improvement or new application of [PICK ONE] theoretical concepts, approaches, methodologies, instrumentation or interventions.

  c) Approach
      i) Preliminary Studies

      ii) Research Design and Methods
          AIM 1
          1.1 Introduction
          1.2 Research Design
          1.3 Expected Outcome
          1.4 Potential Problems and Alternate Approaches
          AIM 2
          2.1 Introduction
          2.2 Research Design
          2.3 Expected Outcome
          2.4 Potential Problems and Alternate Approaches
          AIM 3
          3.1 Introduction
          3.2 Research Design
          3.3 Expected Outcome
          3.4 Potential Problems and Alternate Approaches
